INSTALLATION OF TELESCOPING MOUNTING BARS FOR CALCULITES

READ AND UNDERSTAND THESE INSTRUCTIONS BEFORE INSTALLING FIXTURE.

Important: This accessory kit is used in conjunction with the fixture(s) which you are installing. Proper spacing to ceiling line, as noted on the instruction sheet for the specific fixture being installed, must be adhered to.

1. Slide CROSSBARS into ADJUSTABLE MOUNTING BRACKETS. (see NOTE above)
2. Slide TELESCOPING BARS through CROSSBAR, and with lancements on bars positioned as shown loosely attach one ADJUSTMENT SCREW through each set of TELESCOPING BARS at a point where the ADJUSTMENT SLOT will allow the NAIL TABS to be attached to the wood joists.
3. Hammer NAIL TABS on bars into wood joists.
4. Screw in LOCKING SCREWS loosely, one on each opposing corner.
5. Adjust fixture within framed in network of bars, and tighten ADJUSTMENT and LOCKING SCREWS.
6. MOUNTING FRAME can be adjusted by loosening the screws in ADJUSTABLE MOUNTING BRACKETS.
