Upgrade with versatile style

Whether you are looking to beautify or add a sense of security and well-being to your outdoor space, the highly configurable Hadco LED refractive post tops paired with the latest LumiLock light engine GX4 will definitely help you achieve your goals. A multitude of exterior luminaire styles allow you to create promenades and areas exuding timeless, historical charm both day and night. The configurable LED light engine GX4 is an ideal alternative to HID sources, providing you with significant energy savings, and more choices for light levels, optics and controls.

- Luminaires are available with a variety of cages, finials, roofs, pods and colors to customize the project along with various poles and brackets.
- Variety of dimming and control choices to maximize energy savings and help you prepare for the future.
- Provides a quick and simple retrofit solution for existing Hadco RL and CL Series luminaires while maintaining excellent light levels.
- Includes Service Tag, innovative way to provide assistance throughout the life of the product. For more details visit: philips.com/servicetag
- Field capabilities to change distribution from type 3 and type 5 optics to adapt when needed.
- Variety of drive current and optic choices to provide the right amount of light where you need it.
- Variety of LED color choices in warm and neutral CCTs.

Simple retrofit and upgrade installation

Upgrading a Hadco luminaire from a traditional lamp source to today's LED energy saving technology doesn't have to mean a replacement of an entire luminaire. Hadco's LumiLock provides a quick retrofit solution. Just twist out the existing LumiLock two part assembly and replace it with the LumiLock LED GX4 system. That's it!

Asymmetric or symmetric? With LumiLock LED, you have both.

It may happen that the site environment changed or even your needs evolved, thanks to the ultimate versatility system that allows the LumiLock LED light engine GX4 to quickly be converted in the field from symmetric to asymmetric distribution or vice-versa to adapt when needed.

Versatility in light - Short optics/Wide optics

The new Lumilock LED light engine in the RL and CL Series now includes even more selection beyond the typical type 3 or type 5 distributions. A new option includes the ability to choose between a Short or Wide optic distribution. Choose the Short optic if the requirement is to place more light under the pole and maximize uniformity, or use the Wide optic to maximize pole spacings.

Short optics Wide optics

From simple dimming to state of the art connected lighting solutions

Further versatility can be achieved by incorporating our standalone and connected outdoor LED lighting solutions. From dimming that saves energy, to real-time alerts that enable quicker and more effective maintenance response, Hadco LED refractive post tops with connected lighting solutions provide even greater savings and adaptability to your project requirements.

Because these post tops are renowned to offer the timeless historical aesthetic for that hometown and traditional feel for urban spaces, we now provide the option to order a 5 or 7 pin receptacle inside the luminaire so there is no need for external hardware or components detracting from the decorative aesthetic of the luminaire.
