## AMT8 <br> Aluminum Tapered Pole

Made from tapered 6" to $4^{\prime \prime}$ ( 152 to 102 mm ) round aluminum shaft welded over and in a $8-5 / 8$ " round ( 219 mm ) extruded-aluminum pole base which is welded top and bottom to a cast-aluminum anchor plate. After tapering and welding,the entire shaft assembly is heat-treated to T6 temper. A $41 / 2^{\prime \prime}$ by 10 " ( 114 by 254 mm ) maintenance opening is complete

Note: The recommended method for calculating EPA (Effective Projected Area) is in accordance with AASHTO 2001 standards: for three seconds, the pole is tested in wind gusts equivalent to the strongest winds on record over the past 50 years, and with a 50 pound load ( 22.7 kg ) placed at 1 foot $(305 \mathrm{~mm}$ ) above its center.

## Specifications

Joint cover
Made from two pieces of cast-aluminum mechanically fastened to the junction with stainless steel hardware.

## Base cover

Decorative base cover made from cast-aluminum pieces mechanically assembled together with stainless steel hardware around base of the pole.

## Finish

Color to be in accordance with the AAMA 2603 standard. Application of polyester powder coat paint ( 4 mils $/ 100$ microns) with $\pm 1$ mils $/ 24$ microns of tolerance. The Thermosetting resins provides a discoloration resistant finish in accordance with the ASTM D2244 standard, as well as luster retention in keeping with the ASTM D523 standard and humidity proof in accordance with the ASTM D2247 standard.
