

# INSTALLATION INSTRUCTIONS

## ICL - Internal Concentric Glare Louver

### Opening Glass Door Frame

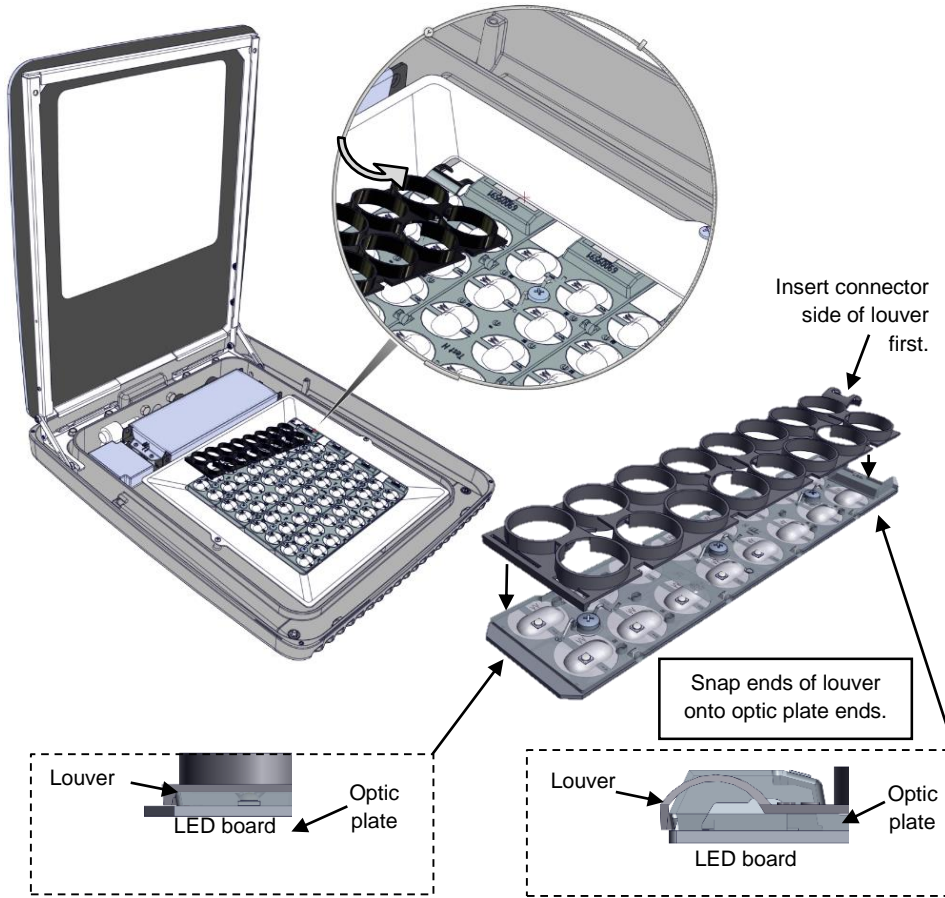

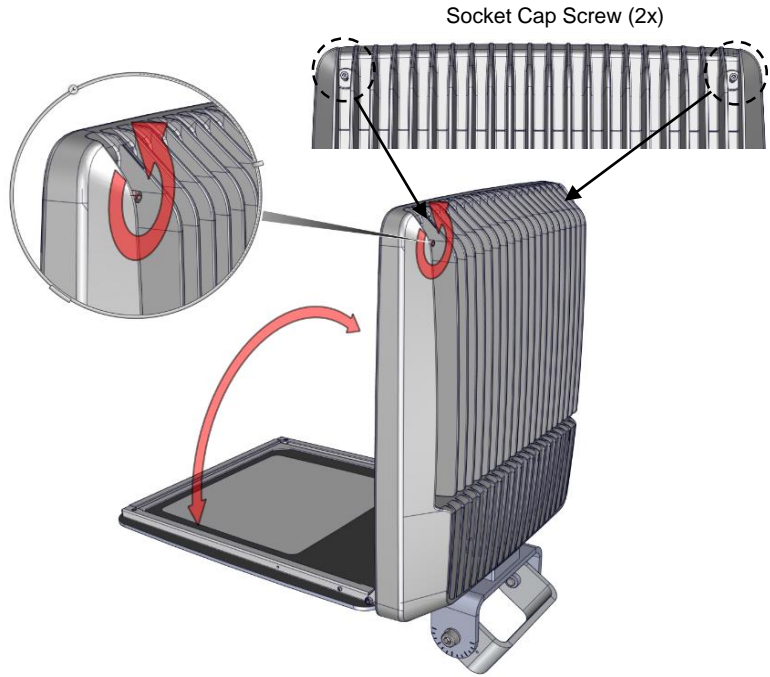

**Note:** Procedure to open glass door frame is the same on slip fitter and yoke mount fixtures.

#### STEP 1:

Loosen two captive socket head cap screws with 5/32 allen key on either side of top rear floodlight cast housing.

#### STEP 2:

Rotate glass door frame down to fully open position as shown here.

#### STEP 3:

Correctly position louver over optic plate and LED board assembly in luminaire. There should be one (1) louver for each LED/Optic assembly configuration.

#### STEP 4:

Slide connector side of louver under reflector pan and lightly push down on louver to snap onto end of optic plate.

#### STEP 5:

Carefully align louver with optics and lightly push louver down to snap onto other end of optic plate.

#### STEP 6:

After installing internal louvers, carefully rotate glass door frame up into closed position and retighten screws loosened in
