1. Wattage and lumen output may vary by +/-8% due to LED manufacturer forward volt specification and ambient temperature.
2. Lumen values based on photometric tests performed in compliance with IESNA LM-79.

Predicted Lumen Depreciation Data

Ordering Codes	Ambient Temperature °C	LED Current mA	Driver Output Current mA	L ₇₀ per TM21 ^{1,2}	Lumen Maintenance @ 60,000hrs
GCR60-SCT-G1-SM-5-10-BZ	25°C	108mA	1300mA	>60,000hrs	70%
GCR90-SCT-G1-SM-5-10-BZ	25°C	95mA	1900mA	>60,000hrs	70%

1. L70 is the predicted time when LED performance depreciates to 70% of initial lumen output.
2. Calculated per IESNA TM 21-11. Published L70 hours limited to 6 times actual LED test hours.

Dimensions

Specifications

Housing and Heat Sink

Single piece die cast Aluminum alloy. Housing also acts as a heat sink, designed to ensure high efficacy and superior cooling by natural convection. Air flow pattern always close to LEDs and driver optimizing their efficiency and life. Product does not use any cooling device with moving parts (only passive cooling).

Mounting

Die formed steel plate is supplied for mounting to a recessed or surface mounted 4" (10.16 cm) junction box (by others) – flush ceiling mount to a recessed junction box, direct mount to a surface-mounted junction box or pendant installation with 3/4in conduit. Integral hanger on the plate supports the luminaire during wiring. Single screw secures luminaire for quick and easy installation.

Lens

UV stabilized polycarbonate clear lens with extruded silicone gasket surrounding the entire perimeter of the LED light engine and electronics compartment providing an IP65 seal. Lens secured with tamper-resistant screws.

Light Engine

Composed of 3 main components: LED Module/Optical System/Driver. Electrical components are RoHS compliant.

LED Module

Selectable Color temperature: 3000K, 4000K and 5000K. CRI 70.

Optical System

Type V symmetric distribution, optimized for target lumens and a superior lighting uniformity.

Driver

120-347V electronic driver, operating range 50/60Hz, Class 2.

Other Integrated Features

Surge Protection: Each luminaire is provided as standard with 10kV surge protection.

Integrated Motion and Daylight Sensor

Equipped with an integrated Motion and Daylight Sensor, controlled by a remote hand-held programming device (GC60/90-MH10) not included in the fixture. Information in Page 3.

Sensor Default Setting:

60W

Hold-on time: 5 min, Dimming level 50%, 150lux (active motion sensing), Daylight priority, 100% detection area.

90W

Hold-on time: 5 min, Dimming level 50%, 150lux (active motion sensing), Daylight priority, 75% detection area.

Hardware

All exposed screws shall be stainless and/or corrosion resistant and captive. All seals and sealing devices are made and/or lined with EPDM and/or silicone and/or rubber.

Approximate Luminaire Weight

60W: 5.29lb (2.4kg)

90W: 9.92lb (4.5kg)

Finish

Fade and abrasion resistant, electrostatically applied, powdercoat textured bronze finish.

LED Products Manufacturing Standard

The electronic components sensitive to electrostatic discharge (ESD) such as light emitting diodes (LEDs) are assembled in compliance with EC61340-5-1 and ANSI/ESD S20.20 standards so as to eliminate ESD events that could decrease the useful life of the product.

Certifications and Compliance

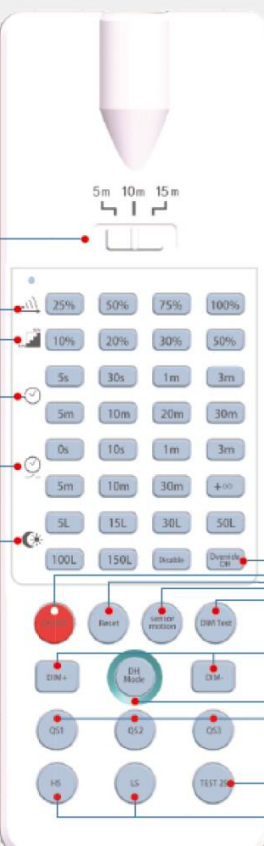

cULus Listed for Canada and USA. DesignLights Consortium qualified. Entire luminaire is rated for operation in ambient temperature of -40°C (-40°F) up to +40°C (+104°F).

IP65 Rating

Entire luminaire including light engine and driver/ electrical compartment IP65 rated.

Limited Warranty

5-year limited warranty. See [signify.com/warranties](https://www.signify.com/warranties) for details and restrictions. Visit our eCatalog or contact your local sales representative for more information.

Remote Control Setting	Button	Remarks																												
		Press the "ON/OFF" button, the light goes to constant on/off mode, sensor is disabled, Press "Reset" "Auto mode" button to quit from this mode and the sensor starts to work.																												
		Press the "Reset" button, all parameters are same as setting of DIP switch or factory settings.																												
		Press the "Sensor motion" button, the light quits from the constant on/off mode, and the sensor starts to work (The latest setting stays in validity)																												
		Press the "Dim Test" button, the 1-10V dimming works to test whether the 1-10Vdc dimming ports are connected properly. After 2s, it returns to the latest setting automatically.																												
		Long press 3s, Daylight priority mode will be switched to daylight threshold mode, lux value will go back to previous one.																												
	 	Short press "DIM+/DIM-" button to Set the output lumen level, each press will $\pm 2\%$ light level																												
		Long press $>3s$, sensor will be switched to daylight priority mode; if preset daylight value is Disable, press DH Mode can not start daylight priority mode.
