## System Overview

These instructions review how to install Sona wall mount fixtures. 4ft and 8ft modules can be installed as individual standalone units, or they can be joined together to create continuous runs. The graphics below show the components required to install a typical run of Sona wall fixtures.

**IMPORTANT:** Read all instructions including fixture wiring AND mechanical details **before** beginning installation.

### Sona power mount kit(s)

- Wall bracket (SI)
- #10-32 x 5/6" machine screw (x3)
- #10-32 x 1/2" Philips screw (x2)
- J-box cover plate (x1)
- 1/2" bushing

#### Sona end kit(s) MODULE2 Endcap (x1) #8-32 x 3/8" Phillips screw (x2) Note: 2 kits required for each row (one for each end). Left and right kits supplied. 63 Sona Joint Kit(s) 8<sup>99</sup>9 Break apart Joiner aligner pair (XI) ٠ 61 #10-24 x 9/16" bolts (x2) ٠ #10-24 nuts (x2) Note: I kit required for each in-row joint **Tools Required:** 4- 15/16"-Medium Phillips Screwdriver 3/8" Wrench, 1/4" ratchet ٠ with 3/8" socket, or 3/8" Sculptured (Standard) Flat GearWrench. 48.0"end and joint

Sona non-power kit(s) Wall bracket (x1)

#10-32 x 1/2" Phillips screw (x2)

## Module Lengths

Mount Spacing Sona wall fixtures come in 4ft and 8ft modules. Overall Variable wall mount brackets can module lengths are shown below. Add 4-15/16" for be positioned within 6" of the each sculpted endcap or 7/16" for each flat endcap. fixture end or joint. Minimum one mount per fixture 4FT Module w/o endcaps -96.0<sup>!</sup> 8FT Module w/o endcaps

## ATTENTION: Install in accordance with national and local building and electrical codes.

RECOMMENDED: For best mounting aesthetics, install switchbox flush with finished wall directly behind fixture's specified power location. Install two studs at mounting location. Leave enough gap between studs to accommodate standard switchbox mounted sideways (about 4"). Make electrical connections in switchbox with supplied SVT cord. Secure power cord with supplied strain relief on the switchbox side.

ALTERNATE: Install switchbox as close as possible to fixture's power mount location. Run power cord (supplied) from switchbox to fixture. Crimp strain reliefs (supplied) on cord inside switchbox and fixturelevel wire cover. Allow at least 12" of cord outside the wall for connection.

Feed SVT cord through hole in supplied switchbox cover plate. Attach cover plate to switchbox with two screws (supplied by others). Secure cover plate to wall structure with two structural screws (supplied by others).

RECOMMENDED: Attach wall mount bracket to switchbox cover plate with 3 screws (supplied). Leave power cord outside wall for connection.

ALTERNATE: Install wall mount bracket within 6" from fixture end, as close as possible to power supply. Secure bracket to wall structure.

Install additional wall mount brackets as required for single fixture or continuous rows. Ensure additional brackets are level with first bracket.

IMPORTANT: Attach wall mount brackets to wall structure within 6" from ends of fixture.

Raise first fixture into position and engage it on wall brackets, then rotate it down into position (as shown).

IMPORTANT: For power locations, knock out 1/2" EKO before raising into position. Go to STEP 6 for further instruction.

#### Sona Installation Instructions Wall I FD ID 77 Sona Wall LED Standalone or continuous run configurations Complete electrical 9 8 Mount second fixture 10 Secure ioint connections at joint

Insert joiner aligners into second (joining) fixture. Raise second fixture into position; at end opposite joint, engage fixture into wall mount bracket (shown in STEP 5). At joint, carefully slide fixture into position so that first and second fixtures are engaged on joiner aligners.

Complete electrical connections at joint using supplied quick-wire connectors. Tuck wires into wiring cavity.

10. Recommended for ease during installation remove both screws holding light engine and untuck diffuser from front lip of housing (See Step 7). This will allow for access to secure joint hardware. (see Step 12).

11

Secure joint using supplied nuts and bolts. Ensure star washer side faces against metal plate at end of fixture. Repeat steps 8 - 10 for each additional fixture in row.

11. Install endcaps using supplied hardware. NOTE: Two different endcaps supplied (left/right). IMPORTANT: Ledalite recommends hand-tightening screws or using low torque setting on power tools.

- 1. Secure fixture(s) to wall mount brackets with two screws (supplied, #10-32 x 1/2") at each bracket location.
- 2. Lift light engine and slide back into place. Tuck diffuser back under front lip of housing.

Secure components (7718)

- Ι. Secure fixture(s) to wall mount brackets with two screws (supplied, #10-32 x 1/2") at each bracket location
- 2. Slide light engine back into place and secure screws once flush to back reflector.
- 3. Secure screws to hold light engine in place. If completing power entry fixture re-install back reflector before sliding back light engine.

Finishing 13

Ensure all components are secure and installed according to code.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interreference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

#### 3. Re-insert the two screws holding light engine in place.

## ATTENTION: Install in accordance with national and local building and electrical codes.
