

# Suspension Accessory

## RC159Z Suspension set SME-4 WH

Accessory, White

Suspension Accessories provide a reliable and versatile solution for suspending selected recessed and surface mounted luminaires, enabling clean and modern installations in a wide range of indoor environments. Designed for compatibility with multiple product families—including SlimBlend, CoreLine Panel Gen6, CoreLine Recessed Gen4 and Ledinaire Panel Gen5—the suspension sets support installers in adapting luminaires to spaces where ceiling integration is not possible or where suspended mounting is preferred for aesthetic or functional reasons. Engineered for ease of installation, the accessories offer a straightforward mounting process with sturdy, high quality components that ensure long term, safe operation. Their adjustable suspension height allows precise alignment, enabling specifiers and installers to create visually consistent lighting lines even across different luminaire families. By offering a simple way to convert recessed or surface-mounted luminaires into suspended versions, Suspension Accessories help reduce installation complexity and extend application possibilities without requiring additional luminaire variants. This enhances project flexibility, reduces inventory needs, and ensures dependable performance. Always refer to the luminaire family's installation instructions to verify compatibility before installation.

### Warnings and Safety

- Always consult the installation instructions of both the accessory and the selected luminaire family before use.
- Ensure the mounting surface and ceiling structure are suitable for suspended loads.
- Installation must be performed by qualified personnel following local safety regulations.
