Single intuitive tool to create the perfect match for your lighting application

Today's manufacturers are able to offer perfectly tailored lighting solutions that are intelligent and so can also be adapted to tomorrow's needs. Our configurable gear units with built-in control functions allow programming of the luminaire's behaviour in order to maximise energy savings and minimise environmental impact. Signify's light configurator is the single intuitive system allowing users to configure all the different functions in every programmable driver from Signify. Creating the perfect match for the application has never been easier.
