

# Meet Philips MasterConnect

## Simple, scalable, standardized, and sustainable

Add connectivity to your lighting in a simple and smart way with Philips MasterConnect, a fully wireless solution.

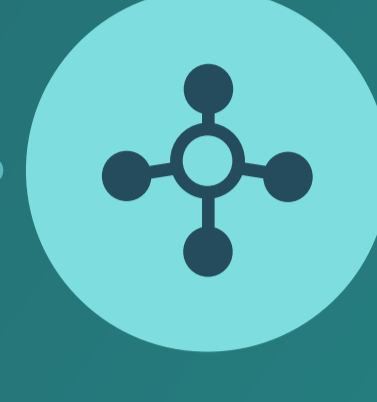

**Scalable – For every system**  
Create every possible configuration using the same suite of components and software

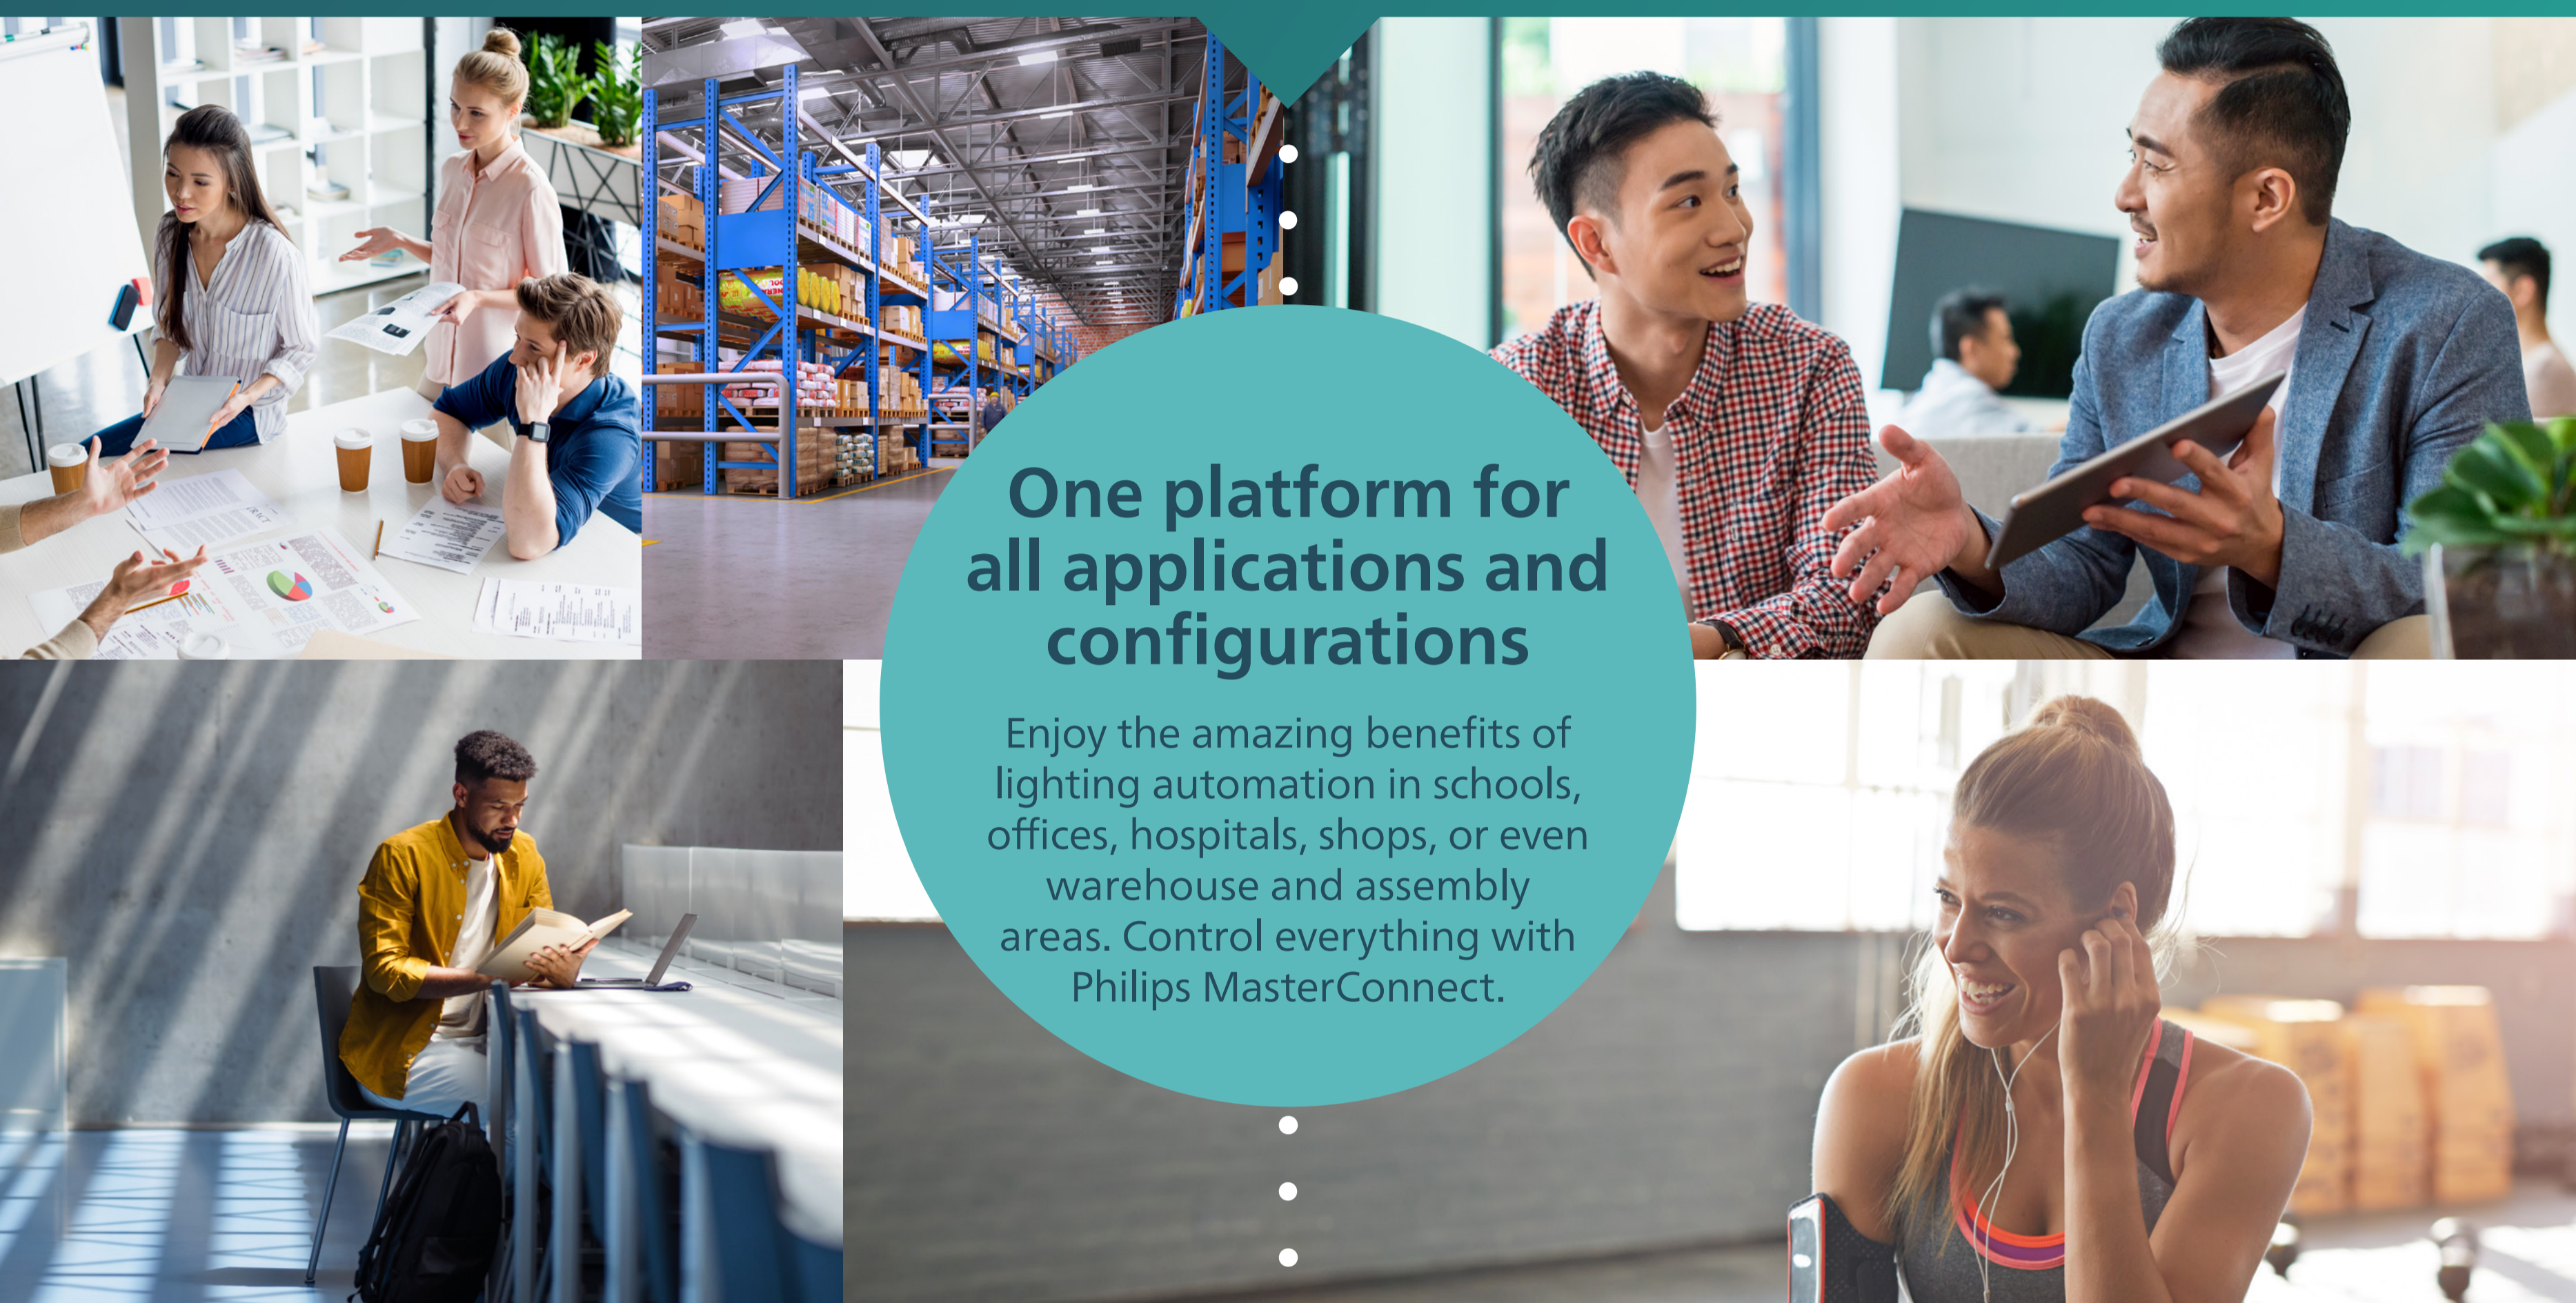

**Sustainable – Energy Savings**  
MasterConnect sensors combined with LED lighting for significant energy savings

**Simple – Easy installation**  
No need to special tooling or extensive trainings given the intuitive mobile app guided set up

**Standardized – Open standards, more choice**  
Create every possible configuration using the same suite of components

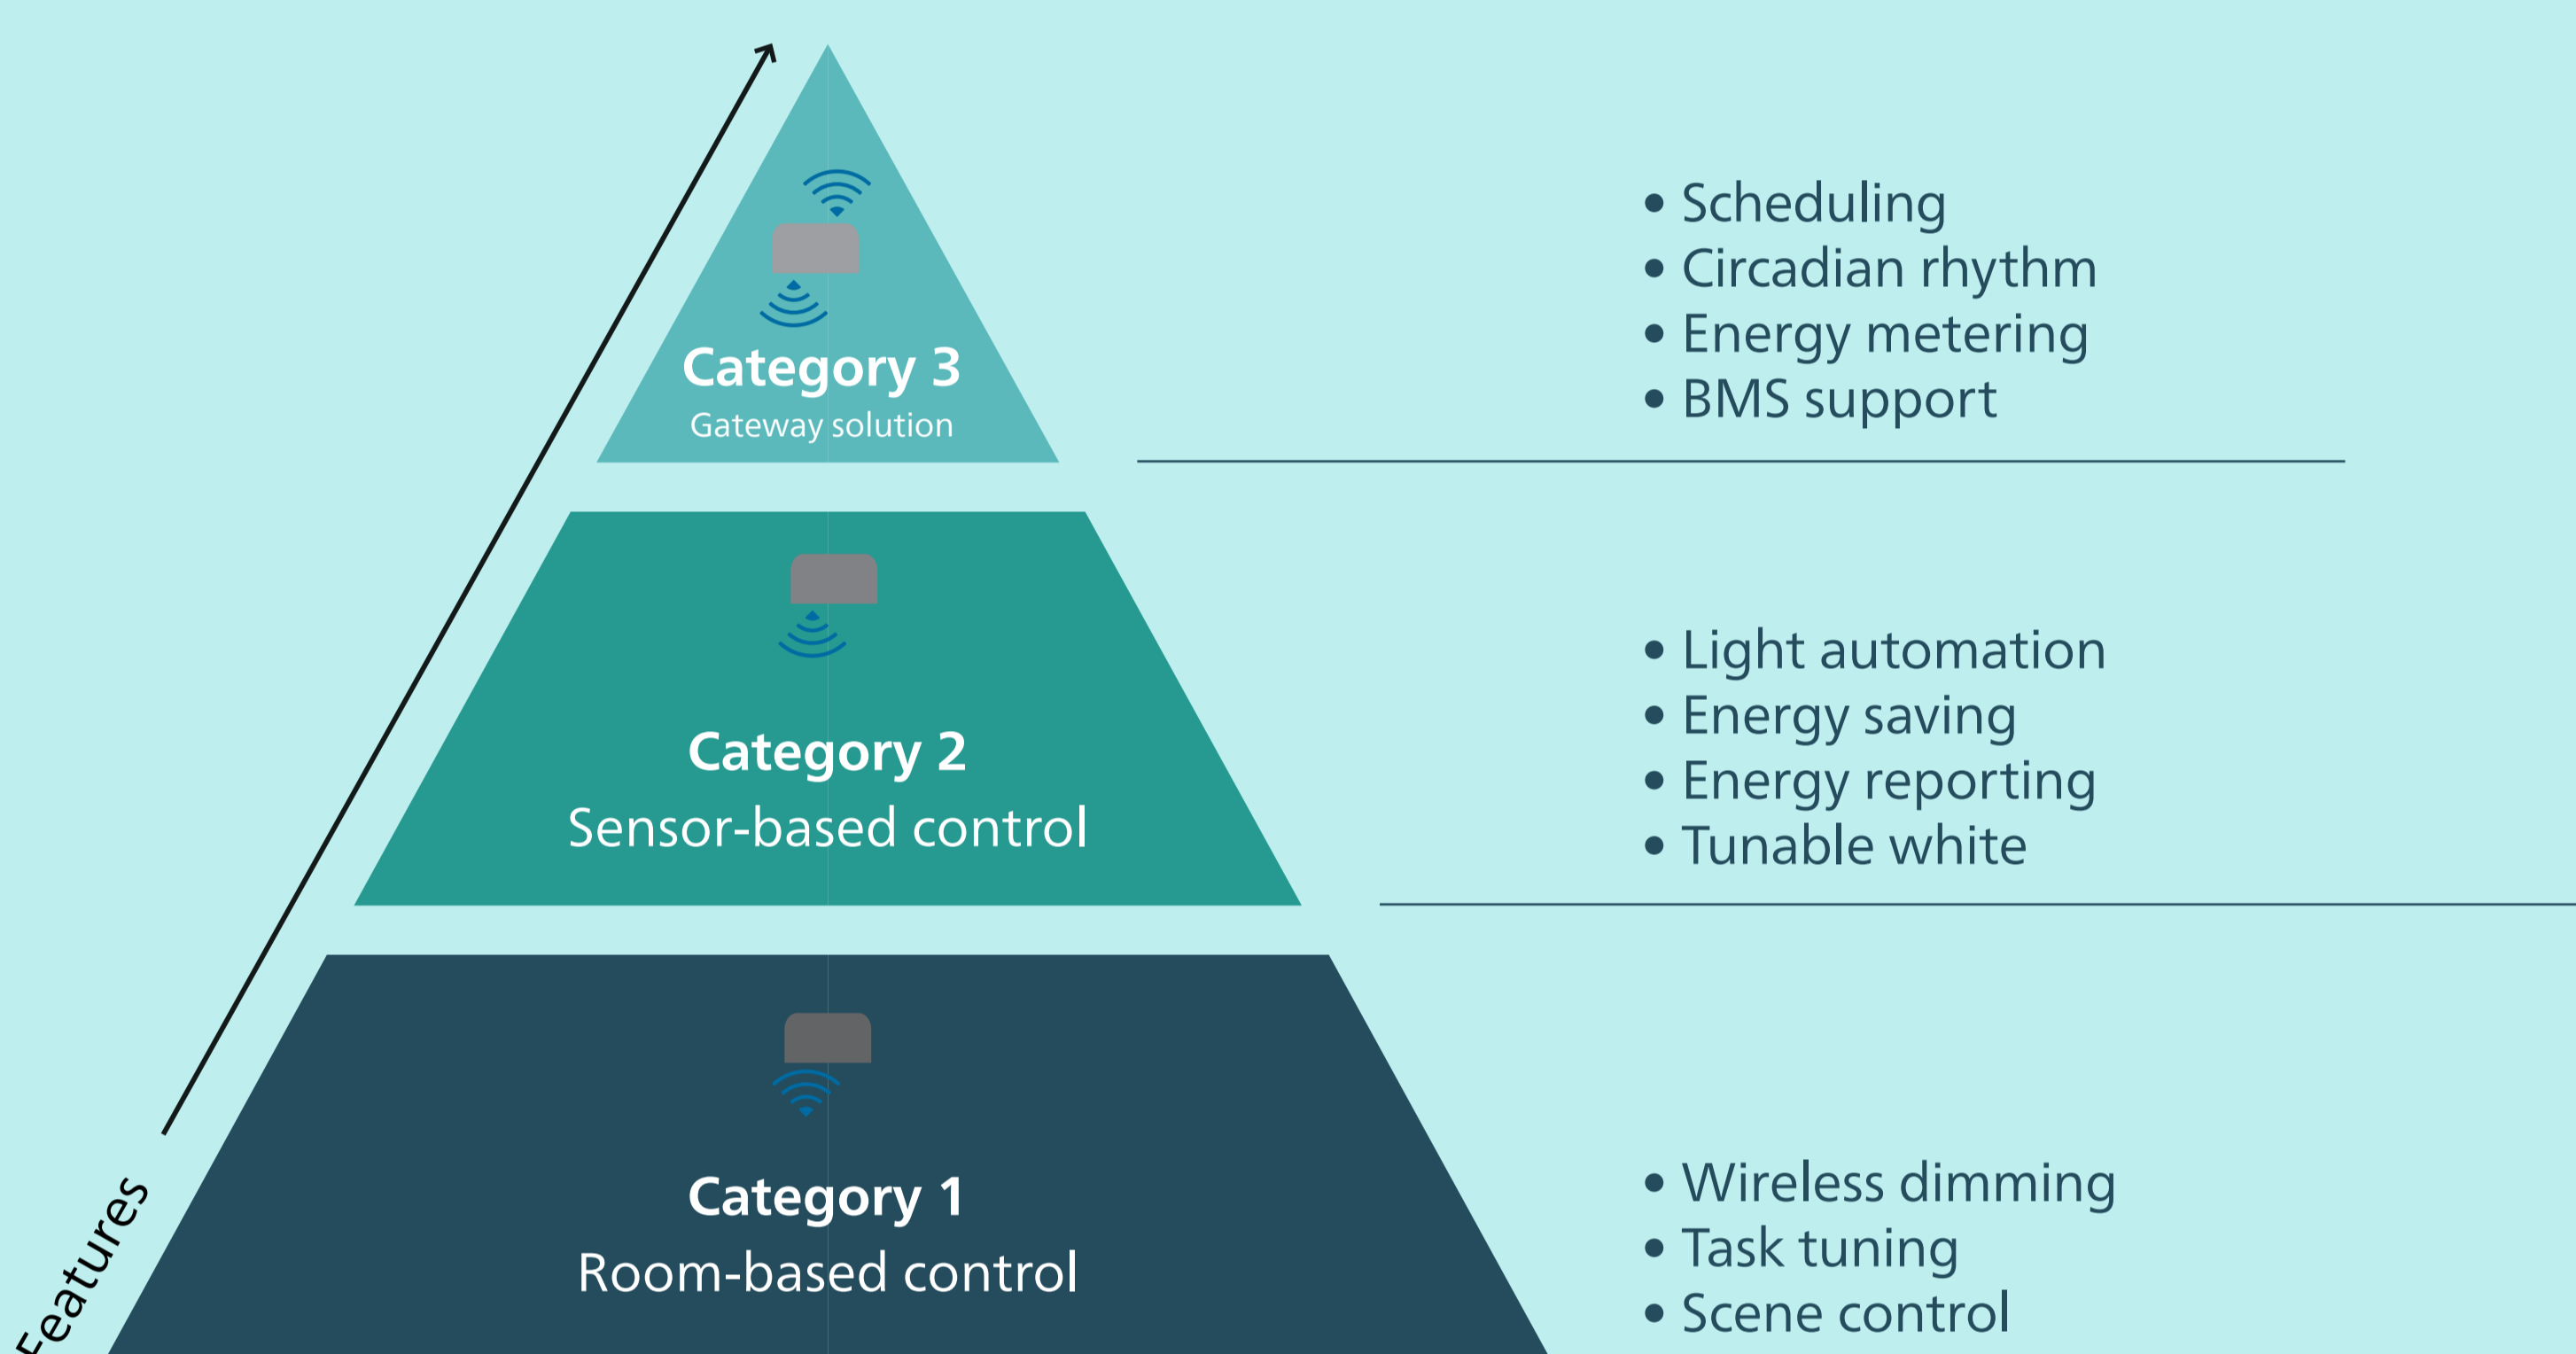

### One platform for all applications and configurations

Enjoy the amazing benefits of lighting automation in schools, offices, hospitals, shops, or even warehouse and assembly areas. Control everything with Philips MasterConnect.

## Adjust MasterConnect to your needs

MasterConnect offers a fully scalable system. You are completely flexible in choosing your solution and able to scale it up when needed.

## Your next step in connected lighting

- Easy, safe, and hassle-free installation
- Completely scalable
- Wireless components that are easy to design into your lighting network
- Create projects for all rooms in a building
