InteGrade makes merchandise shine for the ultimate shopping experience

Supermarkets look for lighting solutions in their multi-decks, chillers, freezers and counters that enhance the shopping experience. Making products more attractive at the point-of-purchase helps boost sales – in both food and fashion retail. Philips InteGrade gen 4 LED lighting solutions for retail displays make merchandize really shine; products and packaging stand out. In this way, Philips helps retailers deliver the ultimate shopping experience, and at the same time, save on energy.

“ Lighting adds impact at the point-of-purchase by enhancing product visibility and attractiveness.”

The best lit products sell better

The shopping experience is evolving. Customers want to see what they're buying and enjoy the experience. In cabinets, shelves and freezers, islands and serve-overs – all require lighting that keep colors looking rich and appealing, and make whites look stunningly white. The right lighting can even make glass doors almost disappear, encouraging shoppers to reach in and take a product.

Lighting solutions for canopy, door and shelf lighting

The fourth generation InteGrade LED modules for canopy, door and shelf lighting offer you a choice of:

- Standard colors for maximum energy saving 3000, 3500, 4000, 5600, 6500K and WarmWhiteRed (WWR)
- Premium white for ultimate product attractiveness (3000 and 4000K)
- High flux for extreme product visibility

InteGrade modules are available as high output 'vision' and cost-conscious 'value' types.

Reduce energy consumption with standard colors

The InteGrade gen 4 high efficacy standard colors enable energy saving for a greener store. They have efficacy up to 137 lumens per watt and color temperatures of 3000, 3500, 4000, 5600K, 6500K plus a WarmWhiteRed (WWR) for bringing out the best in meat. The specially formulated LEDs have a CRI of 90 to really show the natural colors of the merchandise.

Superior light quality with premium white

Premium white technology enhances Ra values across the spectrum resulting in enhanced fresh whites and astonishing lively rich colors. The InteGrade gen 4 premium white modules also have a CRI of up to 95, improved color consistency with 3 SDCM and state-of-the-art efficacy of up to 137 lumens per watt.

InteGrade high flux for ultimate product visibility

The high lumen and lux level in combination with superb optics ensure InteGrade high flux delivers exceptionally uniform light distribution in combination with extreme product visibility.

One shop experience

It's also possible to create a unified look and feel in a store by using the ultra-slim modules in combination with premium white spot lighting solutions.

Canopy versions

Canopy versions of both the standard color and premium white gives light distribution aimed towards the lowest shelf thanks to breakthrough optical design. It creates a continuous line of light that doesn't have undesirable hot spots, glare or reflections. InteGrade gen 4 now enables you to use a miniaturized plug-and-play solution for canopies.

Every store strives for a perfect brand image

Stores pay careful attention to how customers perceive their brand. Image is important regardless of whether a food or fashion retailer aims high for discerning customers or wants to attract budget shoppers. To enable you to build display cabinets and shelf lighting that meet the needs of all retailers, we offer the InteGrade gen 4 LED lighting solutions available in premium white for the ultimate product attractiveness, and in standards colors for optimum energy saving.

InteGrade gen 4 takes retail lighting to the next level

With InteGrade gen 4, you can build unique lighting solutions into refrigerated cabinets, shelves, canopies and doors. The LED engines and fixtures come in a range of color temperatures; 3000, 3500, 4000, 5600K, 6500K and WarmWhiteRed (WWR) for the energy saving standard range; and 3000 and 4000K in the premium white range. The sensational premium white (PW) is specially formulated for superb rendering of whites and colors. Revolutionary integrated optics direct the light exactly where it's needed.

Make frozen and chilled merchandise look more attractive

You can dramatically improve merchandize presentation and visibility with InteGrade gen 4 LED display modules. In contrast to conventional fluorescent lighting and many currently available LED solutions that leave a darker area in the center of the door where it matters most, our specially formulated LEDs and optimized optics ensure that light is uniformly distributed over the whole area. There are no hot spots or warm-up time either.

The real cost of refrigeration lighting

Conventional fluorescent lighting generates heat, which makes extra work for refrigeration systems. In turn, low temperatures reduce the effectiveness of fluorescent lighting. The two systems work against each other, meaning more energy is required to maintain the desired light level. This is both an economical and environmental burden, since refrigeration equipment typically accounts for about half a supermarket's total electricity consumption, 25 percent of which is consumed by the cabinet lighting. LED lighting, with its cool running and high energy efficiency overcomes these drawbacks.

Use Philips LED solutions in refrigeration units to:

- Enhance product visibility and contribute to the shopping experience.
- Meet wider corporate responsibility goals by benefiting from state-of-the-art energy consumption reduction
- Reduce maintenance costs thanks to longer life, fewer lamp changes.
- Shrink carbon footprint to as LEDs contain no mercury or lead.

Flexibility for the perfect lighting experience

One portfolio, many solutions

The InteGrade gen 4 and high flux have replaced the successful InteGrade gen 3. The new expanded portfolio gives OEMs even more flexibility to select color temperature, CRI, lumen package and optics to suit specific applications. With its color rendering index (CRI) of up to 95, InteGrade provides a fantastic color experience with enhanced whites and vibrant colors. Color temperatures range from 3000 to 5600K and include premium white (PW) and WarmWhiteRed (WWR) for special applications.

Maximum design flexibility and hassle-free installation

The minaturized slim design, plug and play simplicity, wide range of engine lengths, color temperatures and accessories give you the flexibility to build a variety of innovative refrigeration systems with the modern aesthetics stores are looking for.

Fewer components per installation

The ultra-thin InteGrade LED engines and fixtures are easily integrated into shelves, door frames, mullions and canopies. Philips also offers Philips Constant Voltage LED drivers. All components come with a five-year warranty.

Design simplicity

Integrate provides standard engine and fixture lengths of 140, 575, 760, 855, 1150, 1180, 1430, 1570 and 1660 mm, to match standard application lengths. This reduces the number of components you need per installation. By combining different lengths, it's possible to illuminate every space. Design simplicity is assured with a range of mounting profiles, mounting clips, power cables and Philips Constant Voltage LED drivers. The accessories fit together for hassle-free installation.

Light where it's needed

When mounted, the engines and fixtures are virtually out of sight, so the customer's attention remains focused on the merchandize. We have optimized optic systems for shelf, canopy and door lighting applications that ensure exceptional light distribution where it's needed. It also produces a continuous line of light without undesirable hot spots, glare or reflections on the merchandize. The result is brighter, more uniform product illumination, both horizontally and vertically. Merchandise looks more appealing.

Exceptionally long lifetime

Philips LEDs have minimal output degradation and color shift over time, so the light stays consistent throughout the long service life. Lifetime is an exceptional 50,000 hours. Note that InteGrade LED high flux gen 4 engines are not standalone and they might need to be integrated with a heatsink for thermal management to achieve the specified lifetime. The cabinet framework can be used for heatsinking. Our design-in service is available to support you.

Key benefits of InteGrade

- Miniaturized slim design for aesthetic integration that ensures attention is focused on the displayed products.
- Enhanced whites and vivid colors thanks to premium white range with a typical CRI of up to 95 and 3 SDCM.
- Natural colors with the standard color range thanks to LED with specially formulated higher than CRI 90 LEDs.
- Revolutionary optics optimized per application to direct the light exactly where you want it.
- Uniform light distribution with narrow beam and uniform beam types for door and canopy lighting.
- Consistent light throughout an extremely long life (50,000 hours) thanks to minimal output degradation and virtually no color shift over time.
- Plug and play solution that enables a continuous line of light, without undesirable hot spots, glare or reflections.
- New mounting clips for InteGrade fixtures enable easy installation and smooth integration for full glass doors.
- State-of-the art energy consumption reduction thanks to new LED technology.

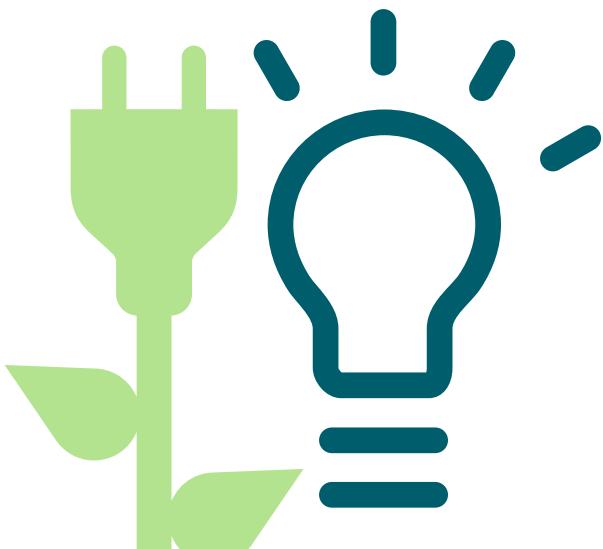

“ InteGrade helps you to build innovative refrigeration systems with the style, performance and cost effectiveness retail outlets need.”

Premium white for retail display lighting

InteGrade gen 4 premium white is specially formulated for ultimate product attractiveness to create the desire of shopping. It is available shelf lighting, and with uniform beam optics for canopy lighting and narrow beam optics for vertical installation in doors.

Exceptional light quality with lower energy consumption
Premium white combines exceptional quality of light with attractive total cost of ownership. We formulated this color for lighting in food retailers, fashion retailers, hospitality and other applications where quality of light is important for the user experience. It lights up the desire of shoppers with a color spectrum optimized for enhanced white performance and astonishing lively rich colors. The state-of-the-art LED technology used for premium white delivers efficacy up to 137 lumens per watt to keep the cost of ownership low.

Consistent look-and-feel throughout the retail outlet
In addition to InteGrade premium white, we also offer Philips Fortimo SLM down- and spotlight modules with premium white for retail applications. This makes it possible for retailers to create a unified shopping experience with accent lighting and cabinet lighting in one unique color. This reinforces brand image, an important aspect for applications where quality of light is an essential part of the shopping experience.

InteGrade Rose for meat and deli lighting

Philips InteGrade Rose G4 modules are the latest addition to our Retail and Display Lighting portfolio.

After extensive research, our R&D department found that the intensity of illumination and wavelength interaction has a direct effect on the discoloration of red meat. Hence, the Fresh Food Rose LED light recipe was born - and has recently been adapted for our modules for refrigeration cabinets.

InteGrade Rose G4 has been carefully designed to interact positively with red meat by utilizing light from the optimum wavelength range in the light spectrum.

Benefits

- A tailored spectra that interacts with meat to reduce oxidation and increase the red color perception
- Up to 10% more efficient than current warm white red modules
- 40% higher red color content on the product after 48 hours' exposure¹
- Enhances visual appeal of red meat, bread, and yellow cheese
- Highly-efficient optics to maximize the light output of your lighting system
- Long lifetime: 100,000 hours
- A smart design with high-quality InteGrade 4 materials
- Maximum design flexibility with an extensive range of engine lengths
- Fully compatible with InteGrade G4 accessories

The high quality and unique benefits of InteGrade Rose G4 modules are backed up by a series of independent experiments performed at the following highly-regarded institutions:

- Philips Research, NL
- Fraunhofer Institute, DE
- Centro Nacional de Tecnología y Seguridad Alimentaria (CNTA), ES

¹ Red color factor content is 40% higher in meat products (Berliner sausage) using InteGrade Rose at 48 hours' exposure compared with WWR, warm white red, modules. Study performed by Fraunhofer Institute.

Introducing high flux for refrigerated display lighting

InteGrade gen 4 high flux is designed for ultimate product visibility to let merchandize shine even through the glass door.

Breathtaking performance

InteGrade high flux LED engines are suitable for chillers with doors and canopy lighting. The high lumen and lux levels in combination with superb optics ensure they have exceptionally uniform light distribution, and deliver a continuous line of light without undesirable hot spots, glare or reflections. InteGrade high flux is now available in premium white to give you the best of both worlds: takes product attractiveness and product

visibility to the ultimate level, and stimulate the desire to buy. The superb lumen performance and high lux levels grab the customer's attention even when products are behind glass door. In fact, the light helps make the doors less visible, which is known to be a subconscious barrier for shoppers.

A solution for every chiller and freezer application

Shelf lighting

For horizontally integrated modules for shelf lighting in open and closed cabinets, choose from:

- InteGrade gen 4 (standard color range or premium white range)

Lighting in chillers with doors

The narrow beam versions have extremely small dimensions for integration into doors and mullions where there is limited space to place a lighting solution. The unique optical system directs the light precisely where you want it, thus making optimum use of the light and energy. The modules are suitable for vertically integrated lighting in chillers. Choose from:

- InteGrade narrow beam gen 4 (standard color range or premium white range)
- InteGrade high flux gen 4 (standard color range or premium white range)
- InteGrade fixtures gen 4 (standard color range or premium white range)

Canopy lighting

The high flux and uniform beam modules provide uniform illumination over the full height of cabinet from the canopy. Choose from:

- InteGrade uniform beam gen 4 (standard color range or premium white range)
- InteGrade high flux gen 4 (standard color range or premium white range)

Philips InteGrade LED products

InteGrade LED system gen 4 (premium white range)

InteGrade LED engines have been designed to match the most common application lengths, reducing the number of components needed per installation; yet maintaining the outstanding flexibility that its modular approach offers, enabling the creation of odd size lighting solutions to match every project specification. Thanks to a range of engine lengths, fixtures, accessories like mounting profiles, mounting clips, power cables, and Philips Constant Voltage LED drivers the InteGrade LED system gen 4 offers maximum design flexibility and plug-and-play simplicity to enable a vast variety of innovative systems with style, modernity and functionality according the needs of the stores.

Philips InteGrade LED products

InteGrade LED system gen 4 (standard color range)

InteGrade LED engines have been designed to match the most common application lengths, reducing the number of components needed per installation; yet maintaining the outstanding flexibility that its modular approach offers, enabling the creation of odd size lighting solutions to match every project specification. Thanks to a range of engine lengths, fixtures, accessories like mounting profiles, mounting clips, power cables, and Philips Constant Voltage LED drivers the InteGrade LED system gen 4 offers maximum design flexibility and plug-and-play simplicity to enable a vast variety of innovative systems with style, modernity and functionality according the needs of the stores.

For shelf lighting InteGrade engine value gen 4 Product specification
