

Daylight experience with sky and superior functional illumination

The NatureConnect mini island creates a convincing skylight effect in windowless spaces. It consists of a Sky & Sun component that fulfills the decorative function of an artificial skylight, and a Daylight component that provides high-quality functional light. Combined with the NatureConnect link or scene set it mimics daylight by simulating the sun's daily patterns, using light recipes that boost energy levels and help indoor spaces feel in sync with nature. Designed for flexible mounting: recessed, suspended or surface mounted.
