

Single intuitive tool to create the perfect match for your lighting application

Today's manufacturers are able to offer perfectly tailored lighting solutions that are intelligent and so can also be adapted to tomorrow's needs. Our configurable gear units with built-in control functions allow programming of the luminaire's behaviour in order to maximise energy savings and minimise environmental impact. Signify's light configurator is the single intuitive system allowing users to configure all the different functions in every programmable driver from Signify. Creating the perfect match for the application has never been easier.

Benefits

- One tool for all configurable drivers, both for conventional and LED systems
- Flexibility for OEM providing access to the features built into the driver
- Optimised for use in the production process
- Unique tool that combines configuration with diagnostics

Applications

- Retail
- Office

- Industry
- Outdoor

Features

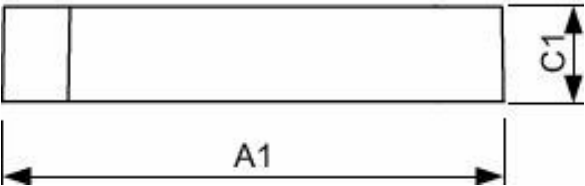

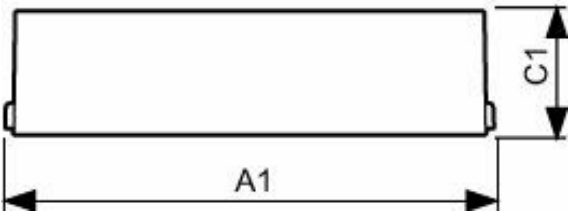

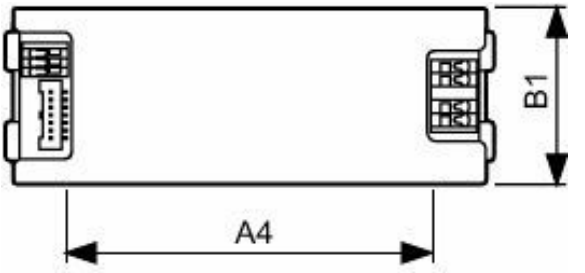

- For use with all LED, fluorescent and HID programmable drivers
- Compatible with standard Windows computers with USB connection
- Different interfaces depending on the installation
- Enables optimisation of installation, last minute changes, easy diagnostics and maintenance.
