

3-circuit square RCS750

3-circuit Square RCS750

The Philips 3-circuit square track system consists of an anodised aluminium profile in natural anodised or painted white in lengths of 1, 2, 3 and 4 m. It contains four electrical conductors allowing easy creation of any required configuration: horizontal or vertical, recessed or surface-mounted, on the wall, on free-standing panels or floating. All luminaires have their separate power supply and can be switched selectively by phase or by circuit. Because the luminaires are easy to move, by simply clicking them in place in the adaptor on the track, changes in the lighting and presentation can be made very simply. All 230V projectors in the Philips range can be installed on this track system. All the associated accessories are common to both the surface-mounted and recessed models and guarantee a good electrical and mechanical connection.

Benefits

- Flexible 3-circuit track system for the professional user, allowing any required configuration to be created relatively easily
- All luminaires have separate power switching so they can easily be moved, for example to create changing atmospheres in shop windows or interiors
- Can be applied as a 'floating' structure using the suspension tubes and clamps provided

Features

- -

Application

- Retail
- Indoor architectural lighting

3-circuit Square RCS750

Versions

RBS750 recessed track, white
