

Quick Start Guide

Installing MasterConnect Systems

June 2026

This guide shows the key concepts of the MasterConnect system.

Signify MasterConnect app

Download the Signify MasterConnect app on your phone and register

Commissioning of lights and switches

Use the app to create projects and group luminaires and switches.

Configuration of groups, zones, or lights

Perform on-site configuration for flexible change of the lighting behavior

Philips MasterConnect Control app

Download the Philips MasterConnect Control app for manual control of lights using a phone

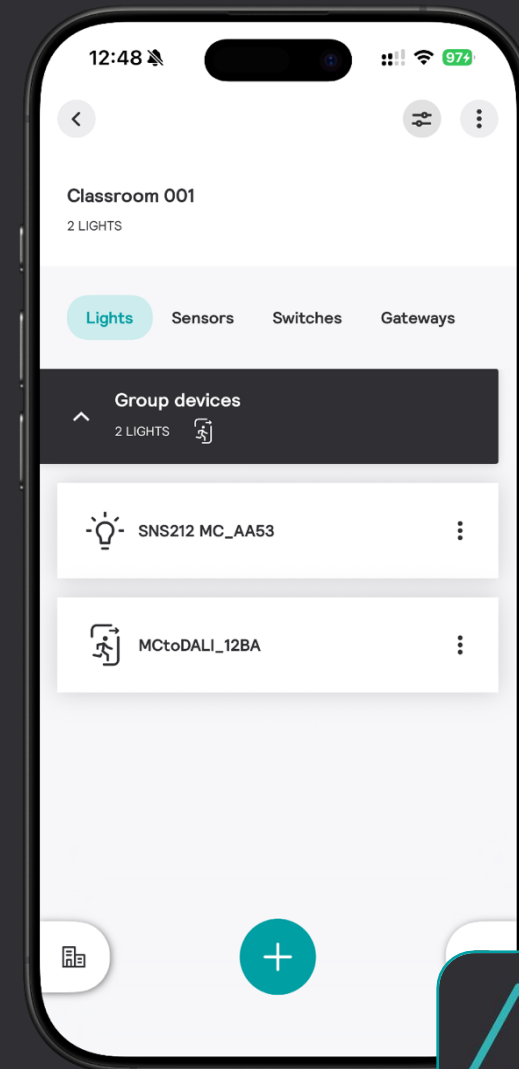

Adding more features

Use of a gateway to enable additional features including automatic energy reporting

Get started with the app!

The **Signify MasterConnect app** is the tool to setup, configure, and manage a MasterConnect system on site.

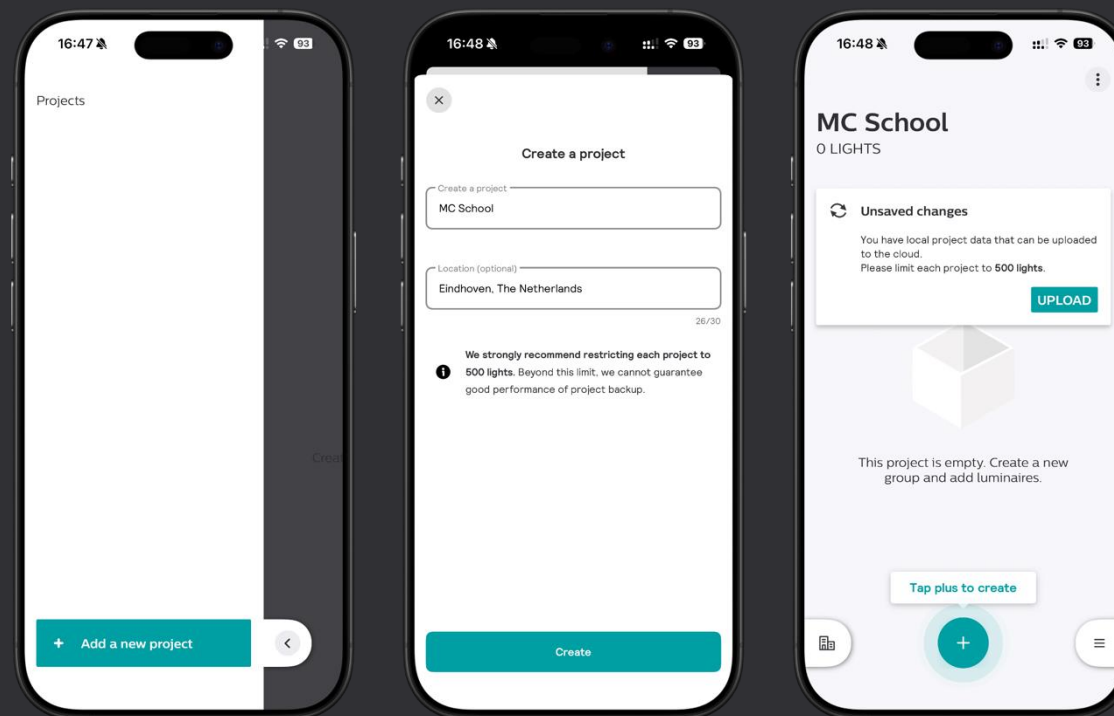

Simply download from the Apple App Store or Google Play and register using your e-mail address to start using the system.

Create a project

Every MasterConnect installation starts with creating a project that contains all information on groups and lights.

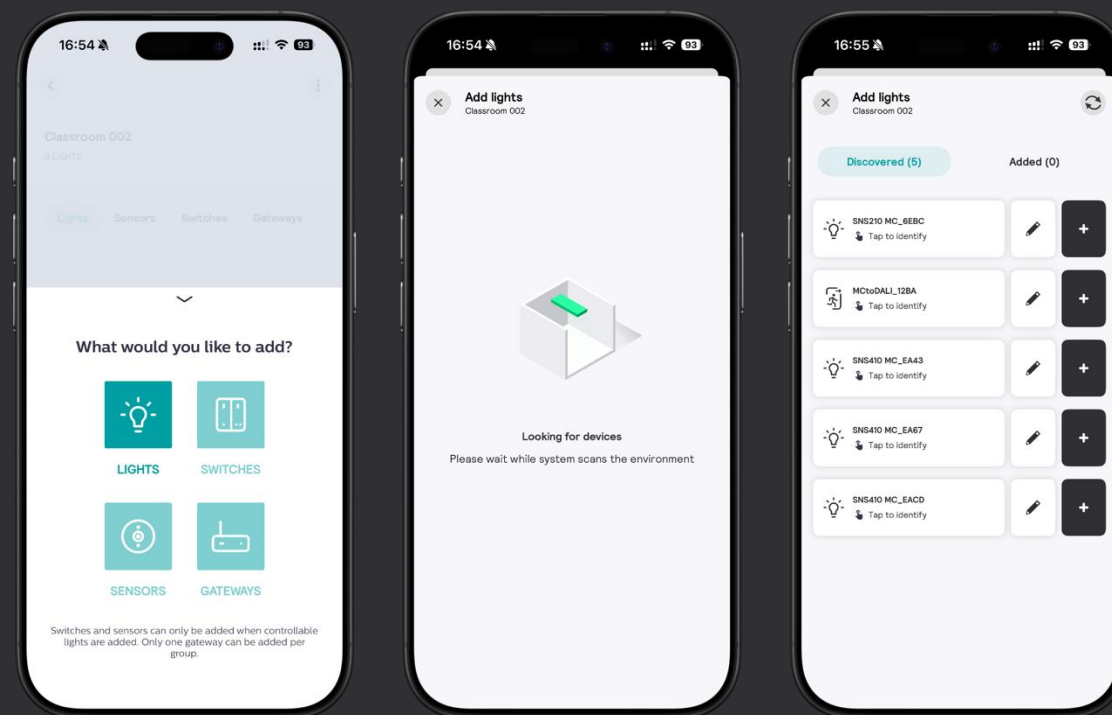

1. Select "Add a new project" from the left side menu to create a new project.
2. Enter a project name and optionally the project location. Confirm by tapping "Create a project".
3. Select the project and start adding groups and lights to the project.

Commission lights

To connect and commission MasterConnect lights, simply create a group and add the lights to the right group using Bluetooth.

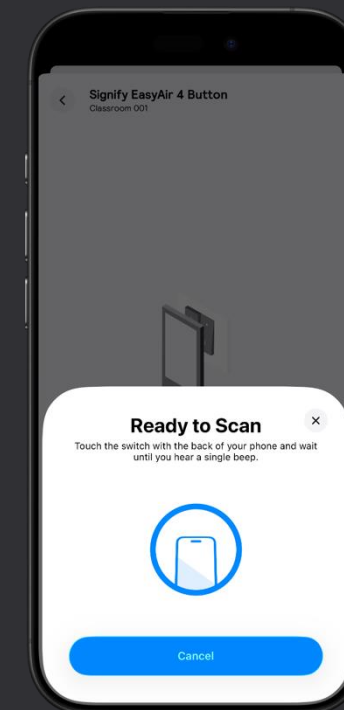

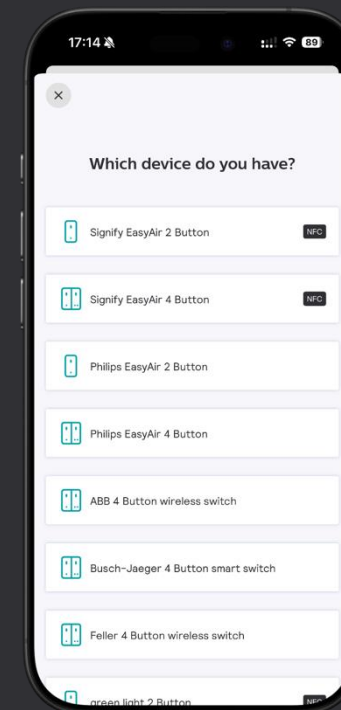

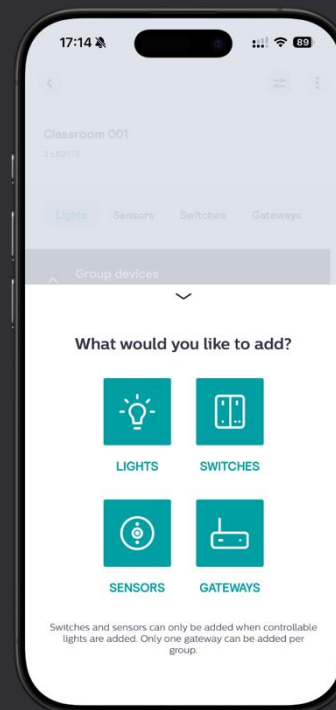

1. Tap “+” and enter a name to create a group
2. Tap “+” and “lights” to add MC devices
3. Wait for the app to discover MC devices
4. Add lights using the device list or with a torchlight (for integrated sensors only) and click “Finish commissioning”

Adding switches

For manual control of the lights, just add a wireless switch to a group or zone.

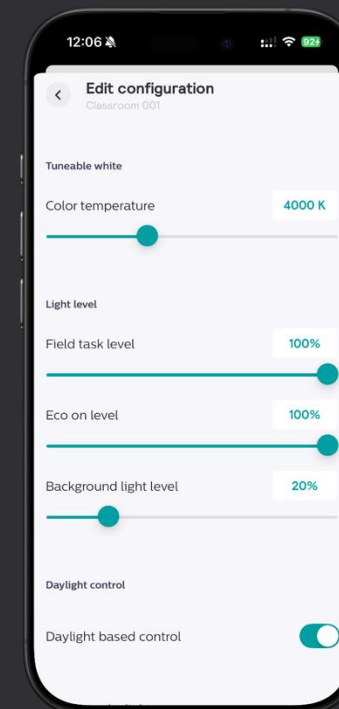

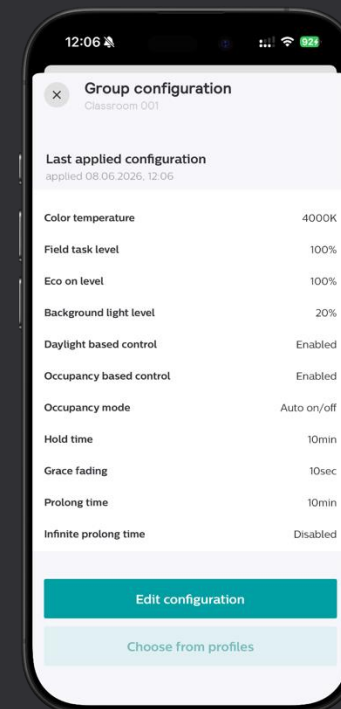

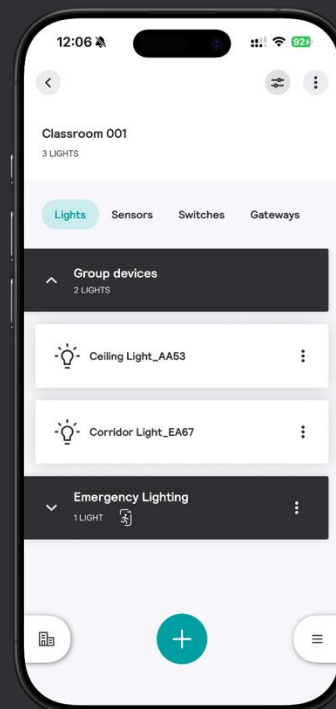

1. Tap "+" and "Switches" to start the process
2. Choose the switch brand and model
3. Follow the instructions to set up the switch
4. For 4 button switches: assign two scenes

Configuration

The default light behavior can be customized to the project requirements by changing the configuration of a group, a zone, or a single light.

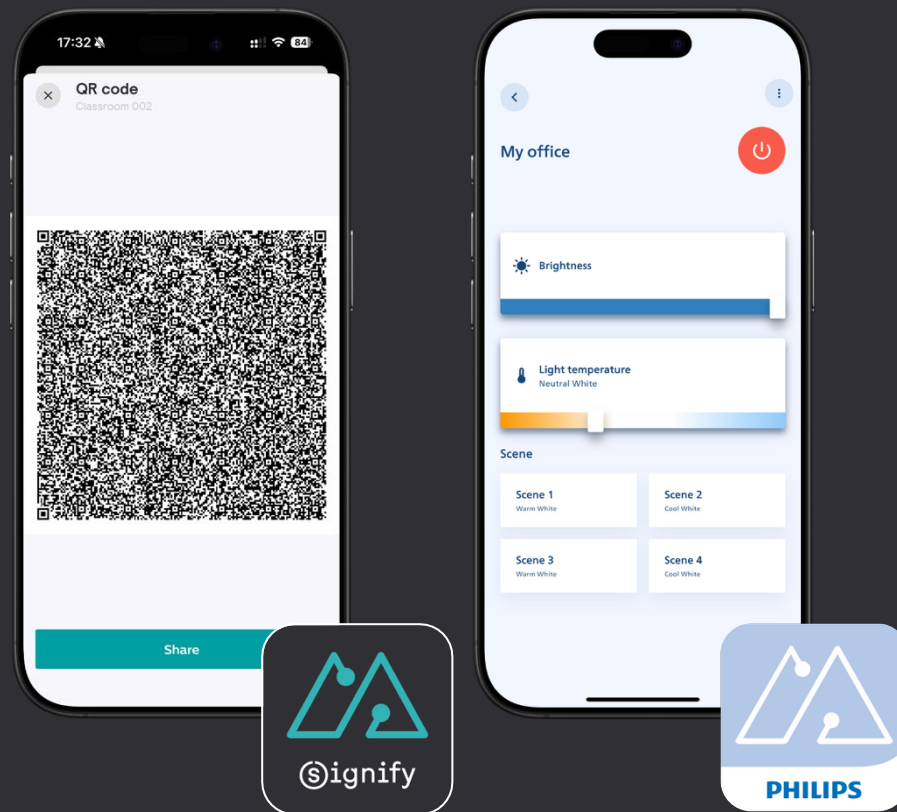

1. After adding the lights, tap 
2. Tap “Edit configuration”
3. Check or change the parameters
4. Tap “Save and apply” to finalize the configuration

MasterConnect Control App

The Philips MasterConnect Control app can be used to dim the lights or change the color temperature of a group or zone.

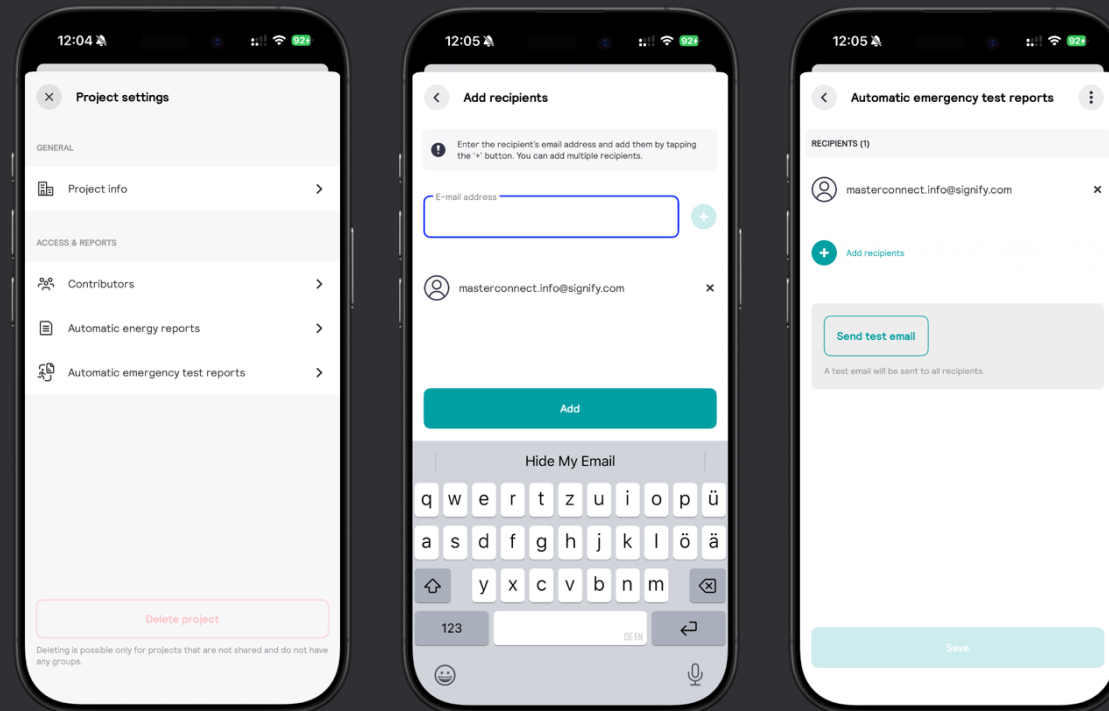

Simply download the Philips MasterConnect Control app, scan the QR code generated in the installer app, and start controlling – no account needed.

Adding more features

By adding a supporting MasterConnect gateway to a group, additional features can be enabled for a project.

1. Tap “+” and ”gateways” to add a gateway
2. Wait for the app to discover gateways
3. Add gateway using the device list and click ”Finish commissioning”
4. Upload the project and open the project settings
5. Add recipients to the desired automatic reports

the meaning of light
