Because light is all around us, the lighting infrastructure is an ideal platform for collecting and carrying information. The Philips Xitanium SR drivers are Sensor Ready. They comply with the D4i standard, making it much easier to mount sensors and communication devices on luminaires. Furthermore, D4i drivers have the capability to store and report a wide range of luminaire, energy and diagnostics data in a standardized format.

Benefits

- Sensor Ready concept, ideal for use with indoor sensors & building management systems
- Integrated power supply to power sensors and wireless radios directly from the driver
- Communication between the sensor or wireless radio and the driver is according to the D4i standard
- Highly accurate integrated power metering for use in building management systems
- Suitable for central emergency DC operation

Features

- SELV
- D4i certified
- SimpleSet configuration interface (NFC)
- Configurable operating windows (AOC)
- Dimming supported during DC operation (DCemDim)
- Constant Light Output (CLO)
- Adjustable Light Output (ALO)
