“

Re-imagining office spaces and improving workplace interactions requires innovation. Emerging technologies from our partners are enabling the core values at BGIS of 'Living sustainably and delivering memorable client experiences', with positive impacts to both our communities and individual wellbeing. With NatureConnect by Signify, we are equipping a newly renovated office space without natural lighting with state-of-the-art LED fixtures that mimic the color and movement of the sun throughout the workday. This provides our client with a cutting-edge collaborative work environment that aims to make the user's experience more engaging, and ultimately more tailored to their daily comfort."
