

1,000 Philips CityTouch projects around the world

5 years after its launch in 2012,
Philips CityTouch has been implemented
in 1,000 projects in 37 countries

Philips CityTouch
is a street lighting
management system

**A scalable software
system to remotely monitor,
control and manage street lighting**
Used in small villages to megacities

Combined use of
LED luminaires and the
Philips CityTouch system
may deliver up to
70% energy savings*
