The design-in process

1 Connect with your business development manager

How can we support?
Application conditions?
Relevant standards?
Dimming desired?
Can we modify the luminaire?

2 Business development manager fills in the design-in request form with you

3 Business development manager connects with the design-in team

5 The simulation/prototype is created and measurements are taken by the design-in team

6 Design-in feasible
Limited feasibility
Not feasible

The design-in report is issued and discussed

7 Prototype is shipped back to you

4 Share your design for simulation or ship your luminaire to our design-in facility
